

Surface Pro 2.2R1 – Release Notes

Software version: 2.2R1 Build 315

System Requirements

- Supported operating systems: Windows® 7 SP1 and all necessary updates, Windows 8.1, and Windows 10 version 1607 (*Anniversary Update*) and 1703 (*Creators Update*) (32-bit and 64-bit editions)
- Processor: Core i5 or better (or equivalent)
- Memory: 8 GB or more
- Minimum available disk space: 500 GB
- Display: 13" or larger (recommended: 15")
- Minimum resolution: 1366 × 768 pixels
- For extensive analysis purposes, we recommend using an additional external monitor, 22" or larger with a minimum resolution of 1920 × 1080 pixels.

New Features and Improvements

- Support for larger inspection reports
- New "move assembly" feature in the 3D environment for better usability
- More flexibility to edit 3D views size
- Support for new PECA™ high-resolution probe reports
- New Drawing tab to import and edit images in the report

Resolved Issues

- Corrected licensing warning when launching software
- Corrected component rotation when editing height
- Corrected unit format inconsistency in the assembly properties
- Corrected component positioning issue
- Corrected display issue with C-scans that have only two lines
- Corrected issue with existing reports not loading
